Dissection Guide And Atlas To The Mink

Synopsis

A Dissection Guide and Atlas to the Mink by David G. Smith and Michael P. Schenk is designed to provide students with a comprehensive introduction to the anatomy of the mink. This full-color dissection guide and atlas gives the student carefully worded directions for learning basic mammalian anatomy through the use of a mink specimen. 3-hole drilled.

Customer Reviews

This book is perfect!!! Great graphics, great descriptions... Can't wait to use it as a study-aid in my A&P class!!!!

Excellent book on mink anatomy. Great for any CVA class.

I am using this for my high school Zoology class. I have lost mine from college but this book provides me with all the detail and information my students will need. Nice clear graphics, clearly written. Only downside is it's softcover and was bent when delivered because the box it was in was crushed. Has 3 hole punches for insertion into a binder, but it is not bound at a spine.
