Customer Reviews

If you are anyone looking to brush up on your math skills I recommend this book. Yes, if you are looking to keep your mind sharp math books are the way to go. There is nothing more to keep you on your toes by exercising your mind with mathematical problems. The older we get the less we use our minds. Some people say good mental exercise will keep you young. So whether you are a teenager, young adult, or are getting up there in years, these books are for you.

gets the job done

Bad quality. Book was torn n not in good shape

I compared the costs of this textbook to other sites. One site had the used book priced at \$77.50. Your link to Bookbyte helped me secure the book in good condition for \$14 plus shipping. It arrived in great condition with a new book cover. There were erased markings in the book but that is to be expected in a math textbook. Very happy with my purchase.

great book

Good book, good seller!

Great savings for me

Book arrived quickly and was in excellent condition for a 'used' book. Very happy with this purchase!! I will order again. It is a shame that our public schools no longer order books, but I am thankful for so my child can be given a textbook at a reasonable price!
