A Birdwatchers' Guide To Morocco

Synopsis

Morocco is a paradise for birdwatchers with its coasts, islands, wadis, plains, forests, mountains and deserts creating conditions that are often very different from those found in Europe. The richness of these habitats is clearly illustrated by the 452 species which have been recorded so far. Fifteen years have passed since the publication of the first edition of this book. This is a very short period in the dynamics of bird communities, but a very long period in a country that has developed so quickly. The Government is encouraging development and tourism, for example in the Atlantic West Sahara, which opens up great new sites for birdwatchers. The most important, and easily accessible of these new sites have been included in this second edition, and the original 15 sites have been increased to at least 50.

Customer Reviews

This bird watching book has detailed maps and some illustrations, but no photos of the birds likely to be found. Unless you are an expert bird watcher and can identify the birds by name and description alone, this book is not helpful.

The title is a bit deceptive. This is NOT a field guide of local bird species, it's a list of birding sites around Morocco with maps. If that's what you're looking for. Great. If not, look elsewhere.

Great book of birds found in Morocco. Had all the information to identify the birds seen at the

various parts of the country.
