Customer Reviews

This book is compelling. Simply fascinating. Here we are offered insight into the legendary corner man of boxing and their takes on their fighters and their opponents. The approaches and styles are as different as boxers themselves. These corner men were often as fascinating as the fighters themselves. Some were vivid, colorful and tailored their approaches. Others were scientific and analytical. You learn much about the lives, the details and the business of boxing. What it takes to develop and inspire fighters to the next level. This one is a must for any serious boxing fan. All the great trainers are represented here and it's interesting how their views of certain fighters and fights contrast.

Considered by some to be the greatest book ever written about boxing, this book features interviews with a number of legendary boxing trainers as they talk about the art/craft of the sport. A must read for any serious fan of the fight game.

Excellent book, well written and hard to put down. Its like your listening to the different trainers talk about there careers and tell historical boxing stories they personally witnessed. If your a boxing fan you will love this book.

Another excellent book on how great boxers are created and handled. Full of colorful, quirky characters born of hard times.
